

Anti-Lobbying and Political Contributions Statement

OutBe S.r.l. Società Benefit is committed to conducting its relationships with public institutions, policymakers, business networks and other stakeholders with integrity, transparency and in accordance with its purpose as a Benefit Corporation and B Corp.

No lobbying for private business interests

OutBe does not engage in professional or systematic lobbying activities intended to influence legislation, regulation, public policy or public decision-making in order to obtain preferential treatment or advance the company's private commercial interests.

OutBe does not employ or mandate professional lobbyists to conduct such activities on its behalf and does not use its participation in external organisations or collaborative initiatives as an indirect means of pursuing private lobbying objectives.

No political contributions

OutBe does not make financial or in-kind contributions to political parties, political candidates, electoral campaigns or organisations established primarily to support political candidates or parties. Company resources, including financial resources, services, facilities or employee time provided on behalf of the company, are not used to support electoral or partisan political activities.

Participation in public-interest and multi-stakeholder initiatives

As a Società Benefit and B Corp, OutBe may participate in multi-stakeholder initiatives, industry and professional networks, B Corp and Benefit Corporation communities, public consultations, research projects, working groups and collaborative sustainability initiatives involving companies, public institutions, universities, non-profit organisations and other stakeholders.

The purpose of such participation is to contribute expertise, exchange knowledge, promote collaboration and support positive environmental and social outcomes consistent with OutBe's purpose and impact objectives.

These activities are conducted transparently and in the public interest and do not constitute professional or systematic lobbying on behalf of OutBe's private business interests.

Where OutBe participates in consultations or dialogue with public institutions, its contribution is intended to share knowledge, evidence and experience relevant to environmental or social challenges, rather than to seek preferential regulatory or commercial treatment for the company.

Transparency

OutBe is committed to maintaining a clear distinction between constructive stakeholder engagement and lobbying for private business interests. Should the nature of its activities in this area materially change in the future, OutBe will review this statement and ensure appropriate transparency and compliance with applicable requirements.

This statement is publicly available on the website as part of OutBe's commitment to transparent and responsible governance.
